

Convertra

LIBRARY · ANALYSIS · CONVERSION — Installation Guide

System Requirements

macOS 12 Monterey or later

Apple Silicon (M1/M2/M3) or Intel x86_64 architecture

Around 30 MB of free disk space

No additional software required — ffmpeg is included in the application.

Installation — 5 simple steps

1. Extract the archive

Double-click the .zip file. Inside you will find Convertra.app and this PDF.

2. Move to Applications

Drag Convertra.app to /Applications. This is recommended for proper Dock and Spotlight integration.

3. First launch — only once

macOS may block an unsigned application. Right-click Convertra.app → Open → Open.

4. Add to Dock

Drag the Convertra icon from Finder to the Dock.

5. Ready!

Drag audio files or folders directly into the application window. Select the format and click Convert.

Common Issues

"Application is damaged" or "Cannot be opened"

Open Terminal and run:

```
xattr -cr /Applications/Convertra.app
```

Then launch again using right-click → Open.

Gatekeeper blocks launch:

System Settings → Privacy & Security → Security → Open Anyway.

Quick Look icon shows an old version:

Run in Terminal:

```
sudo rm -rf /Library/Caches/com.apple.iconservices.store && killall Finder Dock
```
